MBD 9: CERTIFICATE OF INDEPENDENT BID DETERMINATION
1. The Municipal Bidding Document (MBD) must form part of all bids\(^1\) invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging)\(^2\). Collusive bidding is a separate prohibition meaning that it cannot be justified under any grounds.

3. Municipal Supply Chain Regulation 38 (1) prescribes that a Supply Chain Management Policy must provide measures for the combating of abuse of the supply chain management system and must enable the Accounting Officer, among others, to:
   a) take all reasonable steps to prevent such abuse;
   b) reject the bid of any bidder if that bidder or any of its directors has abuse the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
   c) cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate Of Bid Determination (MBD 9) must be completed and submitted with the bid:

---

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and/or services for purchasers who wish to acquire goods and/or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

NAMAKWA DISTRICT MUNICIPALITY
NOTICE NUMBER: 32/2016
PROCUREMENT OF PROFESSIONAL CONSULTING SERVICES:
REVIEW, ANALYSE AND UPDATE OF THE RURAL ROADS ASSET MANAGEMENT
SYSTEM (RRAMS)

PART C3: SCOPE OF WORK

C3.1 INTRODUCTION

The purpose of this grant as stated in the Division of Revenue Act (DORA) is to assist rural district municipalities in setting up their Road Asset Management Systems and collect road and traffic data in line with the Road Infrastructure Framework for South Africa (RISFA).

All municipalities have a constitutional duty to provide basic services and the Namakwa District Municipality is no exception. While local governments across the country are duty bound to provide services to their communities, they are also required by the constitution of this country to work towards the realization of national objectives. National targets set by the central government need to be realized by Provincial and Local Governments so as to achieve one goal of systematic intergovernmental synergy.

Also note that it is important for local government to be mindful for the fact that it is not exempted from the national development agenda as outlined in our National Development Plan, which make it clear that meeting our transformation agenda requires functional municipalities and a capable machinery at a local level that can create safe and healthy and economically sustainable areas where citizens and people can work, live and socialize.

The National Department of Transport has identified rural district municipalities in the country as beneficiaries of their Rural Road Asset Management System grant in order to assist and support the management of rural roads through the development of a Road Asset Management System (RAMS). Municipalities will thereafter be expected to make budget provisions to sustain this project by:

- Updating RRAMS information every three years for lower classes 3, 4 and 5 and two years for higher classes 1 and 2 where applicable.
- Ensuring human capacity development for the operation of the RAMS
- Collection of road inventory data including condition assessment and traffic data; and
- Setting up pavement and bridge management systems compatible with national standards.

RAMS seek to develop a common framework for the roads assets management in the country. The RAMS development also aims to:

- Deliver the national government aspirations for a better road network by ensuring that available financial resources are spent in the most effective and efficient manner
- Provide a single assets management protocol/framework for all roads authorities in the republic; and
- Collate credible roads infrastructure data for planning and management.

The intention of the program is to also yield socio-economic benefits by way of skills development and creation of job opportunities.
C3.2 DESCRIPTION OF WORKS

RAMS allows for the comprehensive development of the road network investment strategies within the framework of technically sound and optimal prioritization approach. The road network investment strategies would talk to the maintenance and construction programmes identified by the management system. It begins to provide a framework against which informed decision making may be carried out within the technocratic and political domains.

Essentially, a road management system seeks to respond to the following questions:

- How is the road network?
- What needs to be done to improve the road network condition?
- How much money is available?
- How much money is needed to improve the road network condition?

This project seeks to review, analyse and update the Roads Asset Management System and collect municipal roads and traffic data in line with Road Infrastructure Strategic Framework for South Africa (RISFSA). The project outcome will assist with the improvement of the quality of data on roads in order to be able to guide infrastructure investment at local municipalities. The project aspires to have fully updated Roads Asset Management Systems for the District and its six Local Municipalities with the intended outcomes of:

- Improving data on rural roads to guide infrastructure investment
- Reducing vehicle operating cost and extending the lifespan of rural roads

During the previous 3 years (2015/16 to 2017/18) the following deliverables were set and completed:

- Visual assessment of all surfaced road networks within the district
- Visual assessment of all un-surfaced road networks within the district
- Traffic counting and road usage
- Baseline development of the RRAMS GIS Model
- RIFSA Classification
- Development of the PMS (Pavement Management System) model
- RRAMS Interface design
- Traffic counts and recruitment of enumerators
- Business Plans and documentation
- Overall Project Management

The following deliverables is set for the next 3 municipal financial years (2018/19-2019/20):

- Recruitment and induction of additional interns
- Road network integration and RISFSA/RCAM
- Identification of gaps, digitization of gaps and verification of the Road Networks
- 2019 and 2020 Business plan compilation and submission
- Continuous Pavement Visual Inspections and Analysis
- Traffic counts and recruitment of enumerators
- Upgrading of GIS model Development and Thematic mapping and
- Upgrade of existing online GeoRAMS system
- Data reports and RAMS Technical reports
- Project phase close out reports
C3.2.1 Key Performance Areas

a) Project Management and Quality Control

Entails the planning, coordination and monitoring of the various project stages. The aspects of communication with the various project stakeholders are also dealt with at this focus area. Furthermore the administration of the project is also discharged through this focus area.

b) Status Quo Analysis and Review

Entail identifying and understanding the available literature and datasets with respect to Road Assets Management Systems. This will culminate in the production of the Status Quo Analysis and Review report which will report on the status quo and the existing gaps in relation to RAMS that will have to be addressed.

c) Road Network Integration and RISFSA classification

The classification was already completed during the previous 3 years (Phase 1 implementation of the program). The successful Bidder will only be responsible to confirm the classification.

d) RRAMS System Upgrade

Entail continual updating of the RAMS where deemed necessary coupled with on-going professional support. More important gaps in respect of pavement assessments must be addressed and the bridge condition assessments must be carried out. Finally the RRAMS analytical model must be reviewed for suitability and completeness from which detailed another pyrolysis of datasets will be carried out to assist with the prioritization exercise

e) GIS Model Development

The existing GIS datasets from stakeholders will be standardized and integrated to effect for user friendliness. Furthermore standard reports and queries to access the datasets must be developed. Additional data layers resulting from the RAMS data collection exercise must be integrated. Finally a GIS based RAMS custom application will be developed for the purposes of catering for RAMS decision support aspects. The GIS model will be comprehensively documented to allow for end user support and future maintenance of data.
f) Production of RAMS Reports

Entails the compilation and production of the narrative RAMS report with the associated tables, statistical information and thematic maps.

g) Intern Appointment and Training

Five 5 graduates were part of the program but currently only 2 are left. These graduates must be utilized for the duration of appointment of the successful bidder. These graduates will be employed by the Namakwa District Municipality but must be managed by the successful Bidder.

h) Financial Year Close-out

This finally activates the project close-out processes which will see through the development of the project close-out report. Important information on what has been learnt from the project will also be documented.

C3.4 REPORTING REQUIREMENTS

The RRAMS grant is administered by the National Department of Transport (NDoT). This administration involves the assessment of the implementation of DM Activities which realize the grant objectives. In order to carry out this administration NDoT request periodic reporting from DMs. The DoRA gives guidance as to the reporting requirements to assist in the assessment.

The following reports should be submitted accordingly:

- Monthly expenditure report due on the 15th of each month
- Quarterly performance reports due every 30 days after Municipal financial year quarter
- Business Plan / Annual Report every year required
- RAMS data submission
- The service provider must provide monthly written progress report updates and meetings update to the Namakwa District Municipality: Projects Department and all relevant stakeholders;
- Monthly meetings are required with the service provider and the Namakwa District Municipality to review progress and yielded impact will be discussed extensively;
- The developed reports and collected information shall become Namakwa District Municipality’s property;
- Copies of documents, reports and articles gathered during the duration of the contract, as reference materials shall be submitted to Namakwa District Municipality for future use; and
- A hard and a soft copy of the reports and the rural roads asset management system will be given to Namakwa District Municipality.
C3.5 APPLICABLE STANDARDS

The Service Provider shall take cognizance of, and adhere to, all applicable National and International Standards in the execution of his work. Regular condition assessments must be conducted for paved and unpaved roads, bridges and collect traffic data in accordance with the following:

- TMH (Technical Method for Highways) 8 Traffic and Axle Load Monitoring
- TMH 9 Standard Visual Assessment Manual
- TMH 13 Network Level Pavement Surveillance and Measurements
- TMH 19 Manual for the Visual Assessment for Road Structures
- TMH 22 Road Asset Management Manual
- DoT (Department of Transport) Specifications
- TRH 26
- SANS
- COLTO
The Namakwa District Municipality (NDM) is situated in the north-western corner of South Africa and borders the Atlantic Ocean to the west and Namibia to the north. It is also bordered by the ZF Mgcawu and Pixley ka Seme Districts of the Northern Cape Province to the North-East and East, respectively. It is bordered by the Western Cape Province to the South (the West Coast, Cape Winelands and Central Karoo District Municipalities). The district is one of five districts in the Northern Cape Province and situated in the western part of the province. The Namakwa District is the largest district geographically in South Africa. The Namakwa District Municipality (DC6) comprises of the following municipalities with their central business centre mentioned after the name of the each municipality:
